Description

Founded in 2006, One Acre Fund supplies 1 million smallholder farmers with the agricultural services they need to make their farms vastly more productive. Our 8,000+ team is drawn from diverse backgrounds and professions. With operations across six core countries in Africa, we make farmers more prosperous by providing quality farm supplies on credit, delivered within walking distance of farmers' homes, and agricultural training to improve harvests. On average, the farmers we serve harvest 50 percent more food after working with One Acre Fund.

To learn more about our work, take a look at our [Why Work Here](#) blog for more information.

About the Role

The Forecast and Ordering Associate will be focused on building cross-functional relationships, crafting and delivering strategic infrastructure to support forecasting the demand for products to ensure they can be ordered, delivered and satisfy customer needs. The goal is to strike a balance between having sufficient inventory levels to meet customer needs without having a surplus, while keeping cost low and delivering millions of Kilograms of input to thousands of farming families across Kenya.

Responsibilities

Upstream management

- Maintain a constant relationship with the Field operations, retail, marketing, finance and sourcing to understand the demand forecasting drivers.

Downstream management

- Manage Inventory levels.
- Communicate the product inventory strategies (high runners, new products, substitutions, end life) to the Sourcing Team.
- Support Global Sourcing to strategize how to obtain better COGS prices.
- Tune the forecasts and inventory rules according to the demand and market trends.

Analysis

- Analyze quantity and financial forecasts.
- Report of forecasts and inventory Goals.
- Guide the S&OP meetings.
- Follow inventory level and improvement plans.
- Guide convergences and divergences versus the Business Plan.

Qualifications

Across all roles, these are the [general qualifications we look for](#). For this role specifically, you will have:

- Bachelor's Degree, in Business, Supply Chain Management, applied
