### Description

Founded in 2012, SunCulture's Vision is to build a world where people take control of their environment in rewarding and sustainable ways. SunCulture does this by developing and commercializing life-changing technology that solves the biggest daily challenges for the world's 570 million smallholder farming households. We are the largest distributor of solar water pumps / solar irrigation for smallholder farmers in Africa and were selected by Fast Company as one of the World's Most Innovative Companies in 2021.

### About the role

Reporting to DevOps Engineer we seek a fast learning and dynamic junior software engineer in test who will be working in our growing development team leveraging JavaScript and ReactJS. You will pick up a wide range of development tasks, both front and back end. We believe in growing you as an individual and we expect you to take on responsibilities with a can-do attitude.

### Responsibilities

- Collaborate with QA and engineering teams to identify system requirements and design company wide test strategies.
- Running API tests using postman whenever required.
- Conducts planned and ad-hoc performance tests including load, stress, latency and, scalability tests individually or under guidance of senior engineers for all technical solutions provided within SC and provide written reports.
- Participate in incident investigations under guidance of senior engineers.
- End to end Tests and regression tests on Various Web and mobile applications as assigned.
- Review test case coverage across all technical solutions on a regular basis and keep it current
- Work together with senior engineers and other important stakeholders to plan the release and support of high-quality releases
- Carry out any other duties within the Quality Assurance Section so desired by the DevOps Engineer.

### Qualifications

#### Key Requirements

- Fluent in English is a must
- Experience with Git, Postman, Jira, Slack
- Experience with Mysql and Postgres databases is a plus.
- Proficiency with manual software testing
- Proficiency in juggling multiple work streams, complex problems, and agile timelines.

#### Does this sound like you?

- 1 year + of experience of delivering web and android based technologies
- Within the East African time zone by about 2 hrs on either side
- Proactive, collaborative, organized, curious, problem solver with a "can-do" attitude
- Good presentation skills and the ability to gather feedback from leadership level
